SPECIAL ISSUE 2024

Fire in the Earth System: **a key topic from human to** **natural ecosystems**

Guest editors:

Jesús Rodrigo-Comino (University of Granada, Spain)

Stefan Doerr (Swansea University, UK)

Paulo Fernandes (Universidade de Trás-os-Montes e Alto, Portugal)

Andrés Caballero-Calvo (University of Granada, Spain)

Fire

is a key component of the Earth System and humans used as hunters and farmers. In the 21st century, fire is in the forefront of the environmental management and there is a need to find the role fire must play in our landscape. To achieve success, scientists, citizens and practitioners must interact and networking. fEs2023 propose a conference with scientists, citizens and practitioners to share information, ideas and goals to use fire as a tool to achieve sustainability. We invite participants with backgrounds such as fire dynamics, fire risk management, fire effects on vegetation, fauna, soil and water, and socio-economic, historical, geographical, political perception and land management approaches. We wish to connect the scientific communities from different regions of the world with the practitioners and citizens that will contribute to see different experiences and will boost the emergence of new approaches to fire research. We strongly agree that this special issue coming from this congress organized in Granada will contribute to prepare society, practitioners and scientists to the intensification and geographical spreading of wildfires under the impact of Climate and Land Use Change. Global Change and fire will be two key actors for the fate of the humankind.

Cuadernos Geográficos is a scientific journal edited since 1971 under sponsorship of the Departments of Geography of the University of Granada (Spain). It accepts unpublished research on the relationship between the society and the territory, as contributions to the development of the Geographical Science in any their areas of knowledge, as well chronicles, notes and bibliographical on the geographical activity in any place of the world and, in particular, in Spain and Andalusia, Latin America and the Mediterranean countries.
